INDEX TO VOLUME XXXVIII.

A

Abbe, C., transparency of the atmosphere, 28.
Brunnow's method for the elements of a comet's orbit, 79.
Academy of Nat. Sci. Philad., Proceedings of, 152, 451.
Acclimation of English birds in Australia, 300.
Acid, cobaltic, *Winkler*, 266.
Acids, monocarbon, converted into dicarbon, 265.
Actinophrys, *Clark* on, 331.
Æther, see *Ether*.
Agassiz, L., report by, on Museum of Comp. Zoology, 128.
Agassiz, A., notice of memoir by, on embryology of Echinoderms, 130.
Alger's cabinet of minerals for sale, 301.
Alger, F., obituary of, 302.
Alps, coal in, 122.
American Phil. Soc., Proceedings of, 152, 451.
Analysis, new process of organic, *Warren*, 387.
Andes, new pass across, 147.
Andrews, E. B., on a seam of coal, 194.
Animal substances, petrifaction of, 441.
Annelid, fossil, *Marsh*, 415.
Antozone, *Meissner* on, 18.
Appleton's Encyclopedia, 303.
Arequipa, slopes of, 427.
Artificial anatase, etc., 424.
Astronomical Observatory at Chicago, 148.
Astronomical and Meteorological Association of France, 148.
Astronomy, see COMET, METEOR, PLANET, SHOOTING STARS, SOLAR SYSTEM, SUN.
Association, German, 448.
Atmosphere, on transparency of, *Abbe*, 28.
Atmospheric currents, origin of, *Mayer*, 399.
Atomic weights, *Rose*, 324.

B

Babbage's Passages from the Life of a Philosopher, 303.
Baird's Review of American Birds, 303, 431.
Ball's Alpine Guide, 450.
Barometer, gunnery practice serving as, to determine heights, 299.
Barometric fluctuations, *Chase*, 380.
indications of a resisting ether, *P. E. Chase*, 153.
maxima and minima, *Chase*, 148.
Barrel quartz, *Silliman* on, 104.
Bazendell, periodic changes in the magnetism of the earth, 269.
Beneden's Recherches, &c., 295.
Binocular microscope, *Smith* on Tolles's, 111.
Bischof, on a new earth, 419.
Blood, animalcules in, 293.
electricity of, *Scoutetten*, 110.
Bone-cave, see CAVE.
Botanical notices, *Gray*, 122, 289, 428.
BOTANY—
Bryology, British American, *Mitten*, 291.
Decandolle's Prodromus, 290.
Equiseta, geog. distrib. of, 126.
Göthe's essay on the metamorphism of plants, 126.
Heath in N. America, 122, 428.
Herbarium, a national American, 128.
Hooker's Species Filicum, 429.
Marsilia and Pilularia, *Braun*, 127.
Oliver's Lessons in Botany, 124.
Radicle in plants, *Gray*, 125.
Scirpi of U. S., new, 289.
Sullivant's Icones Muscorum, 291, 429.
Braun, A., on Marsilia, &c., 127.
Breithaupt, rhombohedral and dimetric crystals sometimes biaxial, 425.
British Association, 301, 446.
Bromid of potassium a narcotic, 267.
Brush, G. J., note on pollux, 115.
Bryology, British American, 291.

C

Cæsium in a hot spring, 447.
California, on the geological survey of, by Whitney, 256, 298.
glaciers in, 258.
New Almaden mines of, *Silliman, Jr.*, 190.
high mountains of, 258, 298.
rising of springs in, *Gibbons*, 187.
Canadian Naturalist and Geologist, 450.
Cariboo gold district, 146.
Carrington on Sun spots, 142.
Caspian, volcanic island in, 118.
Catalysis, *H. Rose*, 319.
Cave, bone, in Borneo, 148.
Cave-deposits in the Holy Land, 148.
with human remains in Central of the Reindeer period in Southern France, *J. Evans*, 281.
France, *Lartet* and *Christy*, 145.
Cavern in the Pyrenees with human remains, 277.
of Bruniquel, id., *Owen*, 281.
at Gibraltar, id., 282.
Celestial dynamics, *Mayer*, 239, 397.

with human remains in Central of the Reindeer period in Southern France, *J. Evans*, 281.
France, *Lartet* and *Christy*, 145.
Cavern in the Pyrenees with human remains, 277.
of Bruniquel, id., *Owen*, 281.
at Gibraltar, id., 282.
Celestial dynamics, *Mayer*, 239, 397.

Charcoal formed under pressure, 441.
Chase, P. E., barometric indications of a resisting æther, 153.
on aerial tides, 226.
dependence of terrestrial magnetism on atmospheric currents, 373.
cause of barometric fluctuations, 380.
Chemistry, history of, connected with the life of H. Rose, 305.
Chiton, species of, 185, 431.
Chimenti pictures, *C. A. Joy*, 199.
Chlorochromic acid, spectrum of, 109.
Clark, H. J., on Actinophrys Eichornii, 331.
Coal in the Alps of Mt. Cenis, 122.
near Peking, *S. W. Williams*, 119.
in Venezuela, 288.
on a seam of, *E. B. Andrews*, 194.
Cobalt compound, new, *Braun*, 113.
Cobaltic acid, 266.
Comets' orbits, Brunnow's method for elements of, *Abbe*, 79.
of 1864, 432.
Condensation, *Magnus* on, 109, 110.
Cotopaxi, slopes of, 427.
Cretaceous, see GEOLOGY.
Croll, J., nature of heat-vibrations, 267.
Crookes, on thallium, 266.
Crystals, rhombohedral and dimetric, sometimes biaxial, 426.

D

Dana, J. D., slopes of Cotopaxi and Arequipa, 427.
Dawes, W. R., on the solar surface, 203.
Dawson, J. W., fossils of the Laurentian, 231.
on the drift, 233.
DeCandolle's Prodromus, 290.
Desor, E., on lake-habitations, 437.
Devonian, see GEOLOGY.
Dexter, W. P., biography of H. Rose, 305.
Didunculus, 294.
Dinotherium, a Marsupial, 427.
Doherty's Organic Philosophy, 450.
Dolerite of Canada, *Hunt*, 175.

E

Earth, tidal wave of, atmospheric currents, &c., *Mayer*, 397.
heat of interior of, *Mayer*, 404.
cooling of, in past time, *Mayer*, 407.
Egypt, legacy for investigations in, 300.
Electrical currents photographed, *C. P. Smyth*, 423.
Electric discharge, *Feddersen*, 421.
spark, study of, by aid of photography, *Rood*, 361.
Electricity of the blood, *Scoutetten*, 110.
Elements, on the dark lines in the spectra of, *Hinrichs*, 31.
Elevation, see HEIGHT.
Equiseta, geographical distrib. of, 126.
Erbium, *Popp*, 418.
Essex Institute, Proceedings of, 152, 451.
Ether, barometric indications of a resisting, *Chase*, 153.
Ether, theory of formation of, *Rose*, 319.
Evans, E. W., on the action of oil wells, 159.
Expedition to the Holy Land and Dead Sea, 148.
Eyes, field of vision of, 441.

F

Fish, White, of Great Lakes, proposed introduction of into Scotland, 449.
Fossils, see GEOLOGY.
Fresenius's Manual of Qualitative Analysis, 267.
Fremy, on spontaneous generation, 439.

G

Galvanizing iron, prize to inventor of, 301.
Gardner, J., on a meteor, 295.
Geographical distribution of Equiseta, 126.
Geological survey of California, *Whitney*, 256.
works—Sullivan's Santander, &c., 119.
GEOLOGY:—
Annelid, fossil, of Solenhofen, *Marsh*, 415.
Barrel-quartz of Nova Scotia, *Silliman*, 104.
Coal, see COAL.
Cretaceous in California, *Whitney*, 261.
transition to Tertiary, 287.
Devonian nature of sandstone, of Elgin in Rosshire, Scotland, *Harkness*, 288.
Dinotherium a Marsupial, 427.
Diorites of Canada, *Hunt*, 179.
Drift, *Dawson*, 233.
Human remains, see MAN and CAVERN.
Laurentian fossils, *Dawson*, 231.
Lias, transition to Oolite, in England, *Ramsay*, 285.
Lingula flags of Wales, fossils in, *Salter*, 122.
Lithology, *T. S. Hunt*, 91.
Mastodon in Michigan, *Winchell*, 223.
Oneida conglomerate, *E. Jewett*, 121.
Permian of England, *Murchison*, 287.
Quicksilver mines of California, 190.
Rhætic beds of England, 284.
Silurian rocks of N. Scotia, *Honeyman*, 289.
Tertiary in California, *Whitney*, 262.
Triassic mammalian remains in England, 284, 285.
rocks of the Sierra Nevada, *Whitney*, 260.
See further, VOLCANIC.
German Association, 448.
Gibbs, W., chemical abstracts, 106, 265, 415.
Gibbons, H., on the rising of streams in California, 187.
Gibraltar, human remains in caves in, 282.
Glaciers in California, 258.
Glaisher, luminous meteors, 433.
Gold in British Columbia, Cariboo district, 146.
Gold rocks in Nova Scotia, *Silliman*, 104.
Gorilla, casts of parts of, 292.
Gottschalk, spectrum of chlorochromic acid, 109.
Gray, A., Botanical notices, 122, 289, 428.
on Heath in N. America, 122, 428.
on Radicle-ism, 125.
Herbarium of, at Cambridge, 128.

H

Haidinger, on meteoric irons, 424.
Harkness, on the Elgin (Rosshire) sandstone, 288.
Heat received by the earth from the sun, 399.
of interior of earth, *Mayer*, 404.
of earth, cooling of, in past time, 407.
Heat-vibrations, *Croll*, 267.
Heath in N. America, 122, 428.
Height of Lake Geneva, 300.
of peaks of Sierra Nevada, 258, 298.
Heights in the Rocky Mountains (Pike's Peak and Mt. Gray), 148.
determination of, by gunnery practice, 299.
Hennessy, on Mars, 435.
Herschel, J., on the sun, 143.
Hessenberg's Min. Notizen, 427.
Hinrichs, on researches of, *Kirkwood*, 9.
Hinrichs, G., on the dark lines in the spectra of the elements, 31.
magnetic period depending on the sun's rotation, 420.
Hough, G. H., on a machine for cataloguing stars, 166.
Hunt, T. S., contributions to lithology, 91, 174.
Huxley's Comparative Anatomy, 294.

I

Indium, *Reich* on, 113.
Infusorial earth of Bilin, analysis of, 277.
Insects, ravages of, a cause of their destruction, 299.
Iodine, violet colors from, 148.
Iron, sensitive reaction for, 265.

J

Jet-d'eau from air heated under glass, 445.
Jewett, E., on Oneida conglomerate, 121.
Johnson, S. W., notice of Meissner on Ozone, 18.
Joy, C. A., on the Chimenti pictures, 199.

K

Kirkwood, D., Harmonies of solar system, 1.
Kobell's Geschichte d. Mineralogie, 426.

L

Lakes of Norway, marine crustaceans in, 293.
Lake-habitations in Austria, 439.
in Bavaria, 437.
Lartet, on Man accompanied by the Reindeer in France, 145.
Lavocat, on cephalic vertebræ, 293.
Laurentian, fossils of, *Dawson*, 231.
Lea, M. C., platinum metals, 81, 248.
note on aldehyde, 114.
on a colored derivative of naphthaline, 360.
Level, change of, in Green Mts., *Scott*, 243.
Light, wave-lengths of certain rays of, 415.
determination of wave-lengths by interference bands, 416.
Light, see SPECTRA.
Lithium in a hot spring, 447.
Lithology, *T. S. Hunt*, 91, 174.
Lyceum Nat. Hist., N. Y., Annals of, 152.
Luynes, Duc de, expedition of, to Dead Sea, 148.
Lyell, title of baronet to, 301.

M

Magnetism of the earth, dependence of, on atmospheric currents, *Chase*, 373.
of the earth, on periodic changes in, *Baxendell*, 269.
Magnetic period depending on the sun's rotation, *Hinrichs*, 420.
Magnus, constitution of the sun, 106.
on condensation, 109, 110.
Mammals, Triassic, of England, 284, 285.
Man, accompanied by the Reindeer in France, 145.
accompanied by the Mastodon in California, 264.
flint implements of, etc., in England, 280.
stone-implements of, in India, 443.
ancient factory of flint-implements of, 443.
remains of, in a cavern in the Pyrenees, *Garigou* and *Martin*, 277.
remains of, at Moulin Quignon, 297.
lake-habitations of, on Bavarian lakes, 281.
remains of, in caverns of Bruniquel and Gibraltar, 281, 282.
field of vision in, 441.
Manna lichen, 442.
Mars, *Hennessy* on, 435.
Marsh, O. C., on a fossil Annelid, 415.
Mastodon remains in Michigan, 223.
Mayer, J. R., celestial dynamics, 239, 397.
Melanians, *Stimpson* on, 41.
Meissner, on ozone, 18.
Metals, new mode of reducing, *Poumarède*, 267.
Metallurgy, notice of Percy on, 149.
Metamorphism, local, *T. S. Hunt*, 183.
Meteor seen at Boston, *Gardner*, 295.
see SHOOTING STAR.
Meteoric Iron of Copiapo, 424.
of Sarepta, 424.
Meteorite, Bishopville, *J. L. Smith*, 225.
Rammelsberg and *Kenngott*, 425.
new, of Atacama, *J. L. Smith*, 386.
Meyer's Palæontographia, 428.
Microscopes, binocular, of Tolles, 111.
Miller, W. A., spectrum of thallium, 107.
on photographic transparency, 107.
analysis of a hot spring containing lithium, 447.
Mineralogical notices, notice of Hessenberg's, 427.
Mineralogy, notice of History of, by v. Kobell, 426.
MINERALS:—
Anatase, artificial, 424.
Brookite, artificial, 424.
Chladnite, 425.
Diopside, analysis, *Rammelsberg*, 117.
Esmarkite of Norway, 277.
Forcherite, *Auhhorn*, 277.
Garnet of Elba, *Pisani*, 277.
Gold in British Columbia, 146.
in Nova Scotia, *Silliman*, 104.

MINERALS:—
Hedyphane, *J. A. Michaelson*, 275.
Hornblende, *Mitscherlich*, 116.
Kobellite, analysis, *Rammelsberg*, 116.
Kokscharovite, *Hermann*, 275.
Mica, *Mitscherlich*, 116.
Orthite-like mineral, 275.
Paradoxite, 426.
Planerite, *Hermann*, 276.
Pollux, *Pisani*, *Brush*, 115.
Pyroxene, analysis, *Rammelsberg*, 118.
Quartz of Euba, 426.
Radiolite, *J. A. Michaelson*, 274.
Rutile, artificial, 424.
Samarskite, *Finkener*, 276.
Scapolite, esmarkite identical with, 277.
Schefferite, *J. A. Michaelson*, 274.
Siegenite, analysis, *Rammelsberg*, 117.
Skolopsite, analysis, *Rammelsberg*, 118.
Staurotide, *Mitscherlich*, 116.
Tremolite, analysis, *Rammelsberg*, 117.
Tourmaline, *Mitscherlich*, 116.
Vivianite, analysis, *Rammelsberg*, 117.
Zinc, native, of Australia, 277.
